- Hebrew (Native)
- English (Fluent)

PROFILE

Highly motivated Frontend/Full-stack developer with a solid foundation in creating dynamic and responsive single-page applications (SPAs) using modern web technologies. With expertise in both frontend and backend development, I specialize in React, Node.js, MongoDB.

PROFESSIONAL EXPERIENCE

Fullstack Developer / Coding Instructor

Feb 2022 - Present

MISTERBIT, Tel Aviv

- Contributed to Company Projects - Developed and maintained web applications according to client requirements and company standards.
- Collaborated directly with clients to gather specifications, provide updates, and ensure project alignment with business goals.
- Delivered multiple full-stack development courses at Coding Academy, training 60-70 students per cycle. Helped students grasp concepts and build their own projects.

EDUCATION

Full Stack Developer Bootcamp

Nov 2021 — Feb 2022

Coding Academy

- Intensive 4-month training program focusing on self-led learning and group projects mirroring real-world development teams.
- Acquired expertise in front-end technologies such as HTML, CSS, JavaScript, React, and back-end skills, including Node.js with Express and MongoDB.

PROJECTS

WEBzone - Website building platform

- A Website-building tool inspired by Wix, enabling users to create customizable websites.
- Developed the platform using React, Redux, and SCSS for the Frontend.
- Built the backend with Node.js, Express, and MongoDB for database management, using socket.io for real-time features - [Demo](#), [Frontend Repository](#), [Backend Repository](#).

Portfolio

- Developed and deployed a personal portfolio website using React, TypeScript, Tailwind CSS, and Lucide React to showcase full-stack projects, technical skills, and professional experience.
- Designed with a modern, responsive, and minimalist UI, the site features smooth navigation, interactive animations, and reusable components.
- Hosted on GitHub Pages, it demonstrates proficiency in frontend architecture, component-based design, and performance-optimized development. [Live page](#), [repository](#).
